Thank you for choosing Health Professionals of Winfield as your primary care team!

This document serves as a notice to inform you of our office policy regarding controlled prescription medications. Health Professionals of Winfield, including, Dr. Daisy Matias, Dr. Sapna Shah-Haque, Kimberley Adams-McDarty APRN, Angela Johnson APRN and Laura Thielen, APRN, are limiting our prescribing of controlled substances. This decision has been made with a lot of thought and consideration, and also comes as a response to increased safety warnings from the FDA, increased scrutiny of the DEA and evidence-based practice models, wellness models, and the request of 3rd party payers. Therefore, your prescriptions for controlled substances will not likely be renewed by the above-mentioned providers. We are more than happy to coordinate your primary care needs, but you will need to establish care with a psychiatric specialist, pain management specialist, or other needed specialist of your choice in order to continue obtaining controlled substances.

We will be pleased to assist the specialist of your choice for chronic controlled substances by sending him or her a copy of your medical records, including information regarding your care history, diagnosis, and treatments we have provided.

We highly recommend contacting your medical insurance carrier for a list of contracting psychiatric management, pain management, or other providers that are within your insurance network.

Thank you for allowing us to provide care for your acute illnesses and primary care needs. Should you have any questions or concerns relating to this letter, please contact the office manager.

Sincerely,	
Health Professionals of Winfield Staff
